Mechanisms of Ageing and Development
98 (1997) 269–271

mechanisms of ageing and development

Subject index

Volume 98 (1997)

***age*-1**; Brain; *clk*-1; Phosphatidyl inositol 3-OH kinase (PI3K); Signal transduction; Transcriptional silencer **98**, 223

Ageing; Chromosomal instability; DNA helicase; Progeroid syndrome; System; Werner's syndrome **98**, 239

Age-retarding; Physiology; Longevity **98**, 47

Aging; DNA repair; Transgenic mice; Quantitative extended-length PCR; Mitochondrial DNA damage **98**, 203

Aging; Erythrocyte; Oxidative damage; Malondialdehyde; Ca^{2+}-ATPase; Chemiluminescence **98**, 127

Aging; Founder chromosome; Helicase; Progeria; Werner syndrome **98**, 255

Aging; Free radicals; Mitochondria; Longevity; Heart; Hydrogen peroxide **98**, 95

Aging; Glutathione; Glutathione peroxidase; superoxide dismutase; lipid peroxidation **98**, 177

Aging; Human T cells; Protein tyrosine kinases; T cell receptor signaling; Protein tyrosine phosphatases **98**, 57

Aging impairment reversibility; Endocrine thymus; Brain insulin receptors; Mouse **98**, 37

Aging; Kininogen; Cysteine proteinase inhibitors; Rat liver **98**, 151

Aging; Longevity; Mortality rate; Very advanced age **98**, 167

Aging; Osteoblast; Bone formation; Fibronectin; Oxygen free radical **98**, 113

Aging; Mutation; Transgenic Mice **98**, 189

Bone formation; Aging; Osteoblast; Fibronectin; Oxygen free radical **98**, 113

Brain; *age*-1; *clk*-1; Phosphatidyl inositol 3-OH kinase (PI3K); Signal transduction; Transcriptional silencer **98**, 223

Brain insulin receptors; Endocrine thymus; Aging impairment reversibility; Mouse **98**, 37

Ca^{2+}-ATPase; Aging; Erythrocyte; Oxidative damage; Malondialdehyde; Chemiluminescence **98**, 127

Campylobacter rectus; In vitro aging; Interleukin-1β; Prostaglandin E_2; Lipopolysaccharide; Fibroblasts **98**, 75

Carbenoxolone; Mineralocorticoid receptors; Glucocorticoid receptors; Corticosterone; Steroid metabolism; Intestinal maturation; 11β-Hydroxysteroid dehydrogenase **98**, 139

Chemiluminescence; Aging; Erythrocyte; Oxidative damage; Malondialdehyde; Ca^{2+}-ATPase **98**, 127

Chromosomal instability; Ageing; DNA helicase; Progeroid syndrome; System; Werner's syndrome **98**, 239

PII S0047-6374(97)00126-7

***clk*-1**; *age*-1; Brain; Phosphatidyl inositol 3-OH kinase (PI3K); Signal transduction; Transcriptional silencer **98**, 223

Corticosterone; Mineralocorticoid receptors; Glucocorticoid receptors; Steroid metabolism; Intestinal maturation; 11β-Hydroxysteroid dehydrogenase; Carbenoxolone **98**, 139

Cysteine proteinase inhibitors; Kininogen; Aging; Rat liver **98**, 151

DNA helicase; Ageing; Chromosomal instability; Progeroid syndrome; System; Werner's syndrome **98**, 239

DNA repair; Transgenic mice; Quantitative extended-length PCR; Mitochondrial DNA damage; Aging **98**, 203

Endocrine thymus; Aging impairment reversibility; Brain insulin receptors; Mouse **98**, 37

Erythrocyte; Aging; Oxidative damage; Malondialdehyde; Ca^{2+}-ATPase; Chemiluminescence **98**, 127

Fibroblasts; In vitro aging; Interleukin-1β; Prostaglandin E_2; *Campylobacter rectus*; Lipopolysaccharide **98**, 75

Fibronectin; Aging; Osteoblast; Bone formation; Oxygen free radical **98**, 113

Founder chromosome; Aging; Helicase; Progeria; Werner syndrome **98**, 255

Free radicals; Mitochondria; Aging; Longevity; Heart; Hydrogen peroxide **98**, 95

Glucocorticoid receptors; Mineralocorticoid receptors; Corticosterone; Steroid metabolism; Intestinal maturation; 11β-Hydroxysteroid dehydrogenase; Carbenoxolone **98**, 139

Glutathione; Aging; Glutathione peroxidase; superoxide dismutase; lipid peroxidation **98**, 177

Glutathione peroxidase; Aging; Glutathione; superoxide dismutase; lipid peroxidation **98**, 177

Heart; Free radicals; Mitochondria; Aging; Longevity; Hydrogen peroxide **98**, 95

Helicase; Aging; Founder chromosome; Progeria; Werner syndrome **98**, 255

Human T cells; Aging; Protein tyrosine kinases; T cell receptor signaling; Protein tyrosine phosphatases **98**, 57

Hydrogen peroxide; Free radicals; Mitochondria; Aging; Longevity; Heart **98**, 95

11β-Hydroxysteroid dehydrogenase; Mineralocorticoid receptors; Glucocorticoid receptors; Corticosterone; Steroid metabolism; Intestinal maturation; Carbenoxolone **98**, 139

Interleukin-1β; In vitro aging; Prostaglandin E_2; *Campylobacter rectus*; Lipopolysaccharide; Fibroblasts **98**, 75

Intestinal maturation; Mineralocorticoid receptors; Glucocorticoid receptors; Corticosterone; Steroid metabolism; 11β-Hydroxysteroid dehydrogenase; Carbenoxolone **98**, 139

In vitro aging; Interleukin-1β; Prostaglandin E_2; *Campylobacter rectus*; Lipopolysaccharide; Fibroblasts **98**, 75

Kininogen; Aging; Cysteine proteinase inhibitors; Rat liver **98**, 151

lipid peroxidation; Aging; Glutathione; Glutathione peroxidase; superoxide dismutase **98**, 177

Lipopolysaccharide; In vitro aging; Interleukin-1β; Prostaglandin E_2; *Campylobacter rectus*; Fibroblasts **98**, 75

Longevity; Aging; Mortality rate; Very advanced age **98**, 167

Longevity; Free radicals; Mitochondria; Aging; Heart; Hydrogen peroxide **98**, 95

Longevity; Physiology; Age-retarding **98**, 47

Maloodialdehyde; Aging; Erythrocyte; Oxidative damage; Ca^{2+}-ATPase; Chemiluminescence **98**, 127

Mineralocorticoid receptors; Glucocorticoid receptors; Corticosterone; Steroid metabolism; Intestinal maturation; 11β-Hydroxysteroid dehydrogenase; Carbenoxolone **98**, 139

Mitochondria; Free radicals; Aging; Longevity; Heart; Hydrogen peroxide **98**, 95

Mitochondrial DNA damage; DNA repair; Transgenic mice; Quantitative extended-length PCR; Aging **98**, 203

Mortality rate; Aging; Longevity; Very advanced age **98**, 167

Mouse; Endocrine thymus; Aging impairment reversibility; Brain insulin receptors **98**, 37

Mutation; Aging; Transgenic mice **98**, 189

Osteoblast; Aging; Bone formation; Fibronectin; Oxygen free radical **98**, 113

Oxidative damage; Aging; Erythrocyte; Malondialdehyde; Ca^{2+}-ATPase; Chemiluminescence **98**, 127

Oxygen free radical; Aging; Osteoblast; Bone formation; Fibronectin **98**, 113

Phosphatidyl inositol 3-OH kinase (PI3K); *age*-1; Brain; *clk*-1; Signal transduction; Transcriptional silencer **98**, 223

Physiology; Longevity; Age-retarding **98**, 47

Progeria; Aging; Founder chromosome; Helicase; Werner syndrome **98**, 255

Progeroid syndrome; Ageing; Chromosomal instability; DNA helicase; System; Werner's syndrome **98**, 239

Prostaglandin E_2; In vitro aging; Interleukin-1β; *Campylobacter rectus*; Lipopolysaccharide; Fibroblasts **98**, 75

Protein tyrosine kinases; Aging; Human T cells; T cell receptor signaling; Protein tyrosine phosphatases **98**, 57

Protein tyrosine phosphatases; Aging; Human T cells; Protein tyrosine kinases; T cell receptor signaling **98**, 57

Quantitative extended-length PCR; DNA repair; Transgenic mice; Mitochondrial DNA damage; Aging **98**, 203

Rat liver; Kininogen; Aging; Cysteine proteinase inhibitors **98**, 151

Signal transduction; *age*-1; Brain; *clk*-1; Phosphatidyl inositol 3-OH kinase (PI3K); Transcriptional silencer **98**, 223

Steroid metabolism; Mineralocorticoid receptors; Glucocorticoid receptors; Corticosterone; Intestinal maturation; 11β-Hydroxysteroid dehydrogenase; Carbenoxolone **98**, 139

superoxide dismutase; Aging; Glutathione; Glutathione peroxidase; lipid peroxidation **98**, 177

System; Ageing; Chromosomal instability; DNA helicase; Progeroid syndrome; Werner's syndrome **98**, 239

T cell receptor signaling; Aging; Human T cells; Protein tyrosine kinases; Protein tyrosine phosphatases **98**, 57

Transcriptional silencer; *age*-1; Brain; *clk*-1; Phosphatidyl inositol 3-OH kinase (PI3K); Signal transduction **98**, 223

Transgenic mice; Aging; Mutation **98**, 189

Transgenic mice; DNA repair; Quantitative extended-length PCR; Mitochondrial DNA damage; Aging **98**, 203

Very advanced age; Aging; Longevity; Mortality rate **98**, 167

Werner's syndrome; Ageing; Chromosomal instability; DNA helicase; Progeroid syndrome; System **98**, 239

Werner syndrome; Aging; Founder chromosome; Helicase; Progeria **98**, 255
